OPZIONE FINITURA “CHIA”

Questa lavorazione si ottiene attraverso il processo di spazzolatura con particelle di diamante, che rende la pietra piacevole al tatto. Questa finitura valorizza la naturale bellezza del quarzo e ne intensifica il colore, donando al top un effetto “vissuto”.
Disponibile per tutte le colorazione applicando una maggiorazione.

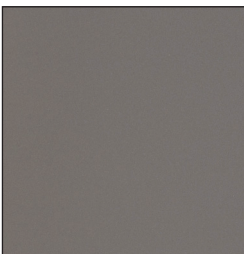

«CHIA» FINISHING OPTION

This processing is achieved through the brushing process with particles of diamond, which makes the stone pleasant to the touch. This finish enhances the natural beauty of quartz and intensifies the color, giving the top a «lived» effect.
Available for all coloring application a surcharge.
